EDUCATION

Singapore Management University BSc Computing and Law, Cybersecurity (2nd Major) • Awards: SMU Global Impact Scholarship • Research: SMU YPHSL, <i>Hercules in Silico</i> (Asst. Prof. Jerrold Soh)	Aug. 2023 - May 2027 GPA: 3.60/4.00
Korea University International Winter Campus 2025, 2026 • Coursework: Advanced Database System (Relational, OO, NoSQL)	Dec. 2025, Dec. 2026

EXPERIENCE

Ministry of Home Affairs, Singapore: <i>Artificial Intelligence Engineering Intern</i> • Implemented a multi-agent swarm in FastAPI , Docker and Azure Container Apps to orchestrate 6 per-run, sandboxed NanoClaw volumes for E2E full-stack app development, cutting prototype delivery time by 92% .	May. 2026 - Jul. 2026
Elefant, Singapore: <i>Full Stack Engineering Intern</i> • Engineered a Medallion ETL pipeline in Scrapy and Playwright with 52 Spiders across 17 jurisdictions, deployed on GCP Cloud Run Jobs to cover 61K+ legal documents across MongoDB and Elasticsearch . • Shipped a 26 -tool MCP Server for cross-store document auditing to cut incident triage time from 30min to 2s .	Jan. 2026 - May. 2026
WhyHow.AI, San Francisco: <i>Backend Development Intern</i> • Architected a multi-agent ETL pipeline using Python and Pydantic AI to detect emergent harms across 50,000+ PubMed abstracts, reducing manual review time by 60% .	Aug. 2025 - Dec. 2025
Custom Automated Systems, Singapore: <i>Software Engineering Intern</i> • Developed a RAG-based refinement engine with TypeScript , Hugging Face and WebGPU , improving query accuracy by 25% across 7,500+ profiles with a 40% reduction in average response latency.	May 2025 - Aug. 2025
Elefant, Singapore: <i>Data Engineering Intern</i> • Built CI/CD pipelines in Python and GCP that automated end-to-end data extraction, enrichment, and validation workflows, reducing data processing effort by 65% and improving data reliability.	Sep. 2024 - Dec. 2024

PROJECTS

- 🔗 **Sea Kayak:** **React** and **Node.js** web application that aggregates, curates and serves real-time legal news from **10+** Singapore sources.
- 🔗 **Jikai:** Tort law hypothetical generation pipeline in **Python** and **LangChain**, enabling law students and researchers to create legal scenarios for academic study with an average generation latency of **3 seconds** per scenario.

AWARDS & COMPETITIONS

SMU LIT Hackathon 2025 1st Place (Ministry of Law Track 2)	Sep. 2025
HackOMania 2025 GeeksHacking Choice Award	Feb. 2025
YouthTechSG YouthxHack 2024 1st Place (Digital Defence Track)	Aug. 2024

SKILLS

- Product:** Product Discovery, PRDs, Product Metrics
- Frontend:** React, Next.js, React Native, Flutter, Electron.js
- Backend:** Python, TypeScript, Go, Rust, SQL, Java, Node.js
- Cloud:** GCP, AWS, Docker, Kubernetes, GitHub Actions, Supabase, MongoDB, Pinecone, Cloudflare
- Legal:** Intellectual Property Law, Privacy & Data Protection Law, Company Law, Contract Law
